Q. WHAT DOES RESTRICTING ACCESS MEAN?
A. Restricting access means ensuring there is a barrier between your child and a body of water. This can be done in two ways:

- **Barrier around the water** – this includes a pool/spa fence with a self-closing and self-latching gate in accordance with AS1926, closing the door to the bathroom after use, using pool/spa/tank covers, placing mesh on water features and fish ponds, ensuring lids are securely on nappy buckets. Note: Inflatables over a depth of 300mm need to be fenced by law.

- **Barrier around the child** – This takes the form of a Child Safe Play Area that can be used inside or outside the home and is especially effective for water you cannot fence like dams on farms.

Restricting access when combined with the other Keep Watch actions of Supervise, Water Awareness and Resuscitate are highly effective in preventing child drowning.

Q. WHY DO BARRIERS FAIL?
A. Barriers can fail when gates are left propped open, fences and gates aren’t maintained and climbable objects are left against the fence. Royal Life Saving encourages parents and guardians to regularly inspect their pool by downloading and completing a home pool safety checklist from www.homepoolsafety.com.au.

**REAL LIFE STORY - HOME POOL SAFETY**

“After hearing about Royal Life Saving’s Home Pool Safety Initiative on television, I was so moved by the information presented I decided to inspect our pool fence in detail. We have recently had our first child in November 2009 and she is very keen on water, she loves our home pool almost too much. When inspecting the fence I found two base screws rusted through and snapped off, leaving one piece of our fence on only 2 rusting screws. Consequently I knocked off early today and repaired the fence with new screws and mounting. Thank you RLSSA!”

---

**RESTRICT ACCESS CHECKLIST:**

- Pool/spa fenced effectively. Completed checklist from homepoolsafety.com.au
- Pool/spa fence and gate regularly inspected and maintained
- Bathtub drained and door to the bathroom closed
- Child Safe Play Area established
- Thin layer of mesh installed under the water surface on fish ponds and water features around the home
- All water bodies with a depth of 300mm or more fenced in accordance with State or Territory legislation

---

From 29 April 2013, pool owners are required to register their backyard swimming pools in an online register to be provided by the NSW State Government. Visit the register website at www.swimmingpoolregister.nsw.gov.au and follow the easy registration steps.

Swimming pool registration is free. If you can’t access the online register after 29 April 2013, your local council will be able to register on your behalf (a fee of up to $10.00 may apply).

The Register will promote pool safety and pool compliance in response to the challenge of reducing the number of deaths and injuries to children in backyard swimming pools in NSW. The Register will provide pool owners with pool safety checklists to help them to self-assess their pool’s safety. Pool owners will be asked to indicate that, to the best of their knowledge, their swimming pool complies with the Standard applicable to their pool. There may be a penalty applied to owners who fail to register a swimming pool by 29th October 2013 (penalty notice amount of $220).
