<td>John Grady: Oval maintenance program tender will go out June 2019. <em>(delayed to August/September)</em> This is suggested to be a two-year contract for different tasks such as aeration (different methods), fertilising, soil testing etc. Tender will be presented as different regions e.g. south, north, central. This allows for tender’s bids for all sites or some sites. To confirm costings and have a contract in place will create better consistency and scale.</td>
