Introduction

Occasionally Council receives requests from community groups and schools, asking for assistance in acquiring reusable materials to use in school programs and community-based projects. This procedure outlines the terms under which such material may be supplied and defines the groups who may receive this material at no charge.

General Principles

Not-for-profit community groups and schools are able to request reusable materials to be saved and set aside at transfer stations and waste facilities. Such requests are to be detailed in writing.

This material may be supplied free of charge if the proposed project or program is likely to result in increased community benefit and particularly awareness of waste-related issues.

Supply of materials at no charge, meeting the above criteria is at the discretion of the Waste Services Manager and the request and approval, outlining relevant limitations shall be documented.

Materials requested under this procedure are to be picked up within a reasonable timeframe (generally within a week of materials being set aside). Pickup and delivery is the responsibility of the organisation making the request.
