Annual Fees and Charges

In accordance with Section 608 of the *Local Government Act 1993* and other relevant legislation, Council is authorised to charge and recover approved fees and charges for any service it provides.

The fees and charges are generally intended to be imposed on the following services provided by Council:

- Supply of a product, service or commodity
- Provision of information
- Provision of a service in connection with the exercise of the Council's regulatory functions, including receiving an application for approval, granting an approval, making an inspection and issuing a certificate
- Admission to any building or enclosure
- Use or benefit from Council's assets and possessions

Council's approach when determining the amount of fees to be charged for goods and services considers the following factors:

- The cost of providing the service
- The importance of the service to the community
- Prices fixed by the relevant industry body/ies

- Any factors specified in the Local Government regulations
- User pays principle with full or partial cost recovery
- Equity factors
- Financial, customer and resource use objectives
- Impact of taxation (for example, GST)
- Market pricing

In cases where a fee and/or charge is determined by legislation or other regulatory bodies, Council's policy is not to determine an amount inconsistent with any fee or charge so determined.

All Council's fees and charges are reviewed on an annual basis prior to finalisation of Council's budget. Fees and charges in general (not including statutory fees or fees set by management committees) will be increased generally by Consumer Price Index (CPI). Any fees and charges relief previously provided in connection with COVID will be rescinded.

In general, amounts between \$0 and \$10.00 will be rounded to the nearest 50c. Amounts between \$10.00 and \$50.00 are to be rounded to the nearest dollar and amounts over \$50.00 will be rounded to the nearest \$5.00. Where GST applies to the fee, amounts will be rounded up to the next 10c.

Pricing Policy

Term	Definition
Full Cost Recovery	Recovery of all direct and indirect costs associated with providing a service including, in some cases, making provision for future expenditure.
Partial Cost Recovery	Subsidised operations which are of benefit to the community as a whole, particularly keeping low-income users in mind.
Market Pricing	Council will not use subsidies to compete unfairly or price others out of the market.
Statutory Fees	Statutory fees are charged at rates defined by the state government in relevant legislation and regulations or certificates. These fees will only be varied by changes to the legislation concerned. The schedule of fees and charges reflects the current statutory fees. All fees gazetted by government may not appear in the published Council Fees and Charges document.
Demand	Pricing structures that reflect real life cycle and environmental costs and recognise that pricing encourages or discourages consumer use and behaviours. These include water, sewer, trade waste and waste charging and car parking fees.
Community Service Obligation	Council is mindful of the effect of its pricing policies when considering the 'bottom line' cost of services or products, or its intention to encourage or discourage consumption or usage patterns. Council may choose not to recover the full cost of delivering a service or product, in recognition of the community's interest in having that service subsidised to enable access to that service by most users. That 'subsidy' is considered a community service obligation and generally applies where the fees and charges schedule discloses 'partial cost recovery' or 'statutory fees'.
Rate of Return Pricing	Pricing for entrepreneurial activities, including investments in financial institutions, will be aimed at securing the optimum return from the assets concerned. Dividends or return on investments (ROI) may also be secured from water and sewer assets based on best practice pricing principles, benefiting the general fund.
Developer Contributions	Contributions from developers reflect the costs of providing infrastructure (roads, carparks, drains, sewerage etc), needed to meet the additional needs of the community created by new development and to make sure existing local amenity does not diminish. Development levies assist the renewal and upgrade of existing open space, community and recreational facilities listed in works schedules appended to the contribution plans.
Private Works	Work done by Council on private land will be charged at rates to recover the labour costs at award rates, plant costs at Council hire rates and a component to cover administration and on-costs.
GST	Goods and Services Tax (GST) will be included on those fees and charges that are considered to be for a taxable supply. Those fees and charges that are of a regulatory nature are GST exempt. GST has been included on or excluded from fees and charges in a manner consistent with the Commonwealth Government's <i>A new Tax System (Goods and Services Tax) Act 1999</i> and Division 81 Determination. Should this legislation be amended, the current treatment of GST and the impact on the relevant fees and charges will be reviewed.
