

Table of Contents

1	Introduction.....	1
1.1	Study Location.....	1
1.2	Study Objectives.....	2
1.3	Study Background and Context.....	2
2	Study Area.....	4
2.1	Catchment Description.....	4
2.1.1	Twofold Bay.....	4
2.1.2	Towamba River	4
2.1.3	Eden and Lake Curalo.....	5
2.1.4	Estuaries.....	5
2.2	Historical Flooding	7
2.2.1	Towamba River	7
2.2.2	Flooding in Eden and Surrounds	9
2.2.3	Boydton Creek, Nullica River and Shadrachs Creeks	9
2.2.4	Coastal Storms	9
3	Review of Available Data	11
3.1	Site Inspections.....	11
3.2	Previous Studies and Reports	11
3.3	Local Policies and Emergency Management Plans.....	12
3.4	Survey Information.....	13
3.4.1	Aerial Survey.....	13
3.4.2	Existing Ground Survey.....	13
3.4.3	Additional Survey	14
3.4.4	Twofold Bay and Lake Curalo Bathymetric Survey.....	14
3.4.5	Historical Flood Marks	14
3.5	Hydraulic Structures.....	14
3.5.1	Towamba River Catchment	14
3.5.2	Boydton Creek, Nullica River and Shadrachs Creek.....	15
3.5.3	Eden.....	15
3.6	Rainfall Data	15
3.7	Flow Data.....	15

3.8	Water Level Data	16
3.9	Coastal Data	17
3.10	Future Development Information	18
3.11	GIS Data.....	18
4	Consultation	19
4.1	Consultation Strategy.....	19
4.2	Agency Consultation	19
4.3	Website and Media.....	20
4.4	Community Newsletter and Survey.....	21
4.5	Community Drop-In Information Sessions	21
4.6	Community and Stakeholder Project Update Emails.....	21
4.7	Public Exhibition	22
5	Flood Modelling	23
5.1	Modelling Approach Overview.....	23
5.2	Hydrological Models	23
5.2.1	Application of Australian Rainfall and Runoff (2016)	25
5.3	DEM Development.....	25
5.4	Hydraulic Models.....	26
5.4.1	Upper Catchment Models.....	26
5.4.2	Eden Model.....	28
5.4.3	Twofold Bay Hydrodynamic Model	28
5.4.4	Coastal Connected Area Models (ICOLLs)	30
5.5	Model Calibration	31
5.5.1	Twofold Bay Hydrodynamic Model	33
5.5.2	Lake Curalo Hydrodynamic Model	33
5.5.3	Towamba River Catchment Hydrological Models.....	33
5.5.4	Towamba River Catchment Hydraulic Models	34
5.5.5	Eden Hydraulic Model.....	35
5.6	Model Sensitivity	35
5.6.1	Roughness	35
5.6.2	Rainfall Intensity.....	37
5.6.3	Blockage	38
5.6.4	Australian Rainfall and Runoff Guidelines.....	39

5.7	Design Flood Events.....	40
5.8	Climate Change.....	41
6	Understanding Flood behaviour.....	43
6.1	Design Flood Behaviour.....	43
6.1.1	Towamba River Catchment Study Areas.....	43
6.1.2	Eden and Lake Curalo.....	48
6.1.3	Lake Cocora.....	53
6.1.4	Shadrachs	54
6.1.5	Nullica & Boydtown.....	54
6.1.6	Twofold Bay.....	58
6.2	Flood Hazard	56
6.3	Flood Function.....	57
6.4	Tidal Inundation Extents.....	59
7	Understanding Flood Risk.....	60
7.1	Advice on Land Use Planning.....	60
7.1.1	SEPP Exempt and Complying Development Codes (2008).....	61
7.1.2	Bega Valley Local Environmental Plan 2013	61
7.1.3	Bega Valley Development Control Plan (BVDCP) 2013	62
7.1.4	Planning Circular PS 07-003	62
7.1.5	Flood Planning Area.....	63
7.2	Emergency Response Classification.....	63
7.3	Flood Impacts on Transport and Infrastructure.....	64
7.4	Cumulative Impacts of Development.....	65
7.4.1	Towamba River Models.....	65
7.4.2	Eden.....	65
7.4.3	Shadrachs, Nullica and Boydtown.....	66
8	Conclusions and Recommendations	67
9	References.....	68
